

Governors to Debate Change in Guards

By FRED S. HOFFMAN
WASHINGTON (AP) — A committee of governors comes to grips with the Army today in a bid for concessions that would permit the states to swallow a drastic reshaping of the National Guard.

Secretary of the Army Cyrus Vance arranged to meet with a seven-man committee headed by Gov. Ernest Vandiver of Georgia.

This committee, representing the 50 governors, was armed with certain proposals advanced by state Guard commanders.

These proposals would not alter the basic elements of the reorganization plan, which calls for breaking up four Guard infantry divisions and eliminating a net of 338 company and detachment size units considered outdated.

It appeared unlikely any meeting would produce any final agreement, although the committee may form some recommendations for the full governors conference.

One political factor seemed to work against any early pact between the Army and the governors. About 19 states are in the process of swearing in new governors, and these men are likely to want to make their own decisions.

Under the law, governors must approve any changes in the National Guard within their states.

Last July, the governors conference took a stand against the plan. In quiet negotiations that followed, the Pentagon yielded on some details such as recognizing the special needs of some states for engineer, military police and other units to handle hurricanes and other disaster situations.

Also, Congress ordered the Army to make its best efforts to keep the Guard at 400,000 men instead of cutting it by 33,000, as the Army had proposed. This, however, was one of the irritants.

Just a month ago, Secretary of Defense Robert S. McNamara sent each governor a revised Guard troop list for his state. At the same time, McNamara ordered into effect a parallel re-vamping of the federally controlled Army Reserve.

The state adjutants general—uniformed commanders of the Guard—gathered here a week later and found Army authorities determined to push the reorganization to completion.

Faced with this, the adjutants general tacitly withdrew further opposition to eliminating four lower-rated Guard divisions and reorganizing them into streamlined brigades.

Try as they might, the Guard chiefs were unable to agree on a unified position on the plan as a whole, and they bucked the problem to Vandiver's committee with a recommendation to ask for three main concessions:

1. Permission to reorganize the remaining 23 Guard infantry divisions into a brigade structure as soon as possible, at the same time as the regular Army goes through this change. The aim is to avoid two separate Guard reorganizations within a couple of years.
2. Authority to exceed 400,000 men over-all from time to time during a year. The idea is to impart flexibility in apportioning strengths among the states.
3. Recognition that some states with small populations may have trouble manning high priority units at 80 per cent of full strength.

New President Takes Over

—Photo by Henry Haynes
NEW PRESIDENT — Dean Murphy, left, being stalled as the new president of Hope Kiwanis at the annual installation and Ladies Night banquet held Thursday night at Hotel Barlow. On the right is Jerry Poe of Hot Springs, Lt. Gov. of this Kiwanis district. Mr. Murphy succeeds Dr. Jim McKenna, retiring president. Other officers installed were: Eddie Whitman, first vice president; James H. Pilkinton, 2nd vice president; Tom Ed Irvin, treasurer; Teddy Jones, secretary. The Rev. Richard Irvin, pastor, St. Luke's Methodist Church, Texarkana, was the principal speaker. About 100 Kiwanians and their wives attended.

Mormons Against Birch Group

SALT LAKE CITY, Utah (AP) — The highest leaders of the Church of Jesus Christ of Latter-day Saints, Mormon, said Thursday they oppose any attempt to link the church with "extremist ideologies," including the views of the John Birch Society.

"We deplore the presumption of some politicians, especially officers, coordinators and members of the John Birch Society, who undertake to align the church or its leadership with their partisan views," said a statement issued by the first presidency of the Church.

"No one should seek or pretend to have our approval of their adherence to any extremist ideologies."

The statement was signed by President David O. McKay and his two counselors, Henry D. Moyle and Hugh B. Brown. As the first presidency, they constitute the church's highest authority.

Utah's coordinator of the ultra-conservative John Birch Society is Reed Benson. He is the son of Ezra Taft Benson, a Mormon apostle who was President Dwight D. Eisenhower's secretary of agriculture.

Reed Benson, also a Mormon, had no comment.

The first presidency said its statement was "made to correct the false statements and unwarranted assumptions regarding the position allegedly taken by the leaders of the Church on political questions in general and the John Birch Society in particular."

Siberians on Way Back to Siberia

By REINHOLD ENSZ
MOSCOW (AP) — The 32 Siberian Christians who sought refuge in the American Embassy are now on their way back to Siberia, a Soviet government spokesman said today.

"They went sightseeing in Moscow Thursday afternoon," he said, "and in the evening they boarded a train which will take them back to where they came from."

Asked if they would get their old jobs back, the spokesman only repeated: "They are going back to where they came from."

The U.S. Embassy said the Soviet Foreign Ministry gave it a firm commitment that the Siberians would get good treatment and the embassy would be advised about the handling of the case.

The Siberians—six men, 12 women and 14 children—pushed aside Soviet police guards Thursday morning and invaded the embassy. They tearfully told American officials they were being persecuted for their religious beliefs and asked the Americans to help them get out of the Soviet Union.

The Americans patiently explained they were powerless to help. The Siberians, from peasant families, refused to budge, so Soviet authorities were notified.

Authorities arrived with a bus and, finally, after arguing and pleading, got them all aboard the bus.

The peasants came from Cherkassk, a coal mining region about 2,100 miles east of Moscow. They described themselves as Evangelical Christians, a small sect which they said does not recognize state authority.

The Soviet press and radio has made no mention of the incident.

In Washington, the U.S. State Department said it does not recognize the right of foreign missions in the United States to grant asylum to U.S. citizens or to intervene in complaint of U.S. citizens against the American government. Therefore, it was explained, U.S. missions in foreign countries refuse to grant asylum.

Fund Raising Drive to Aid Young Girl

FAYETTEVILLE, Ark. (AP) — A fund-raising drive to provide a life-saving heart operation for an 8-year-old Prairie Grove girl is under way here today.

The Fayetteville Northwest Arkansas Times, two banks in Fayetteville and another in Prairie Grove were taking donations for Carol Ann Todd, daughter of Mrs. Peggy Todd.

The Times reported that \$2,676 had been contributed and said the fund probably will reach its goal of \$3,000 by late today.

Doctors say Carol Ann has only a year to live unless corrective surgery is performed on a congenital opening between the upper chambers of Carol Ann's heart and on a heart valve that has been damaged by rheumatic fever.

A reservation already has been made for her admission to the Texas Children's Hospital in Houston, Tex., Jan. 16 to undergo operation preliminary to the delicate operation.

The donation ranged in amount from \$1 to \$100 from individuals and up to \$200 from organizations, the Times said. A surprising number of contributors were taking \$1 to \$5 out of social security pension checks.

Contributions also have come in from various other parts of the state.

U.S. Ambassador Meets DeGaulle

PARIS (AP) — U.S. Ambassador Charles E. Bohlen spent 45 minutes with French President Charles de Gaulle today discussing the Nassau pact and the American offer of Polaris missiles to France.

Bohlen told newsmen the talk had been friendly and cordial but he would not go into detail. In answer to a question he said he had the impression that any negotiations on the missile offer would be long.

De Gaulle already has given an interim answer to the American proposal, which calls for incorporation of the missiles into an allied force. De Gaulle said that France is studying the offer, but will continue its own efforts toward an independent nuclear strike force.

Weather

Experiment Station report for 24-hours ending at 8 a.m. Wednesday High 60, Low 42, precipitation .36 of an inch.

Actor Webb to Undergo Surgery

HOUSTON, Tex. (AP) — Actor Clifton Webb, 70, will undergo surgery Monday for an abdominal aneurysm—blister on the wall of an artery—in Methodist Hospital.

A hospital spokesman said the team of Baylor University School of Medicine heart and artery specialists.

The condition usually is corrected by removing the blister section of the artery and replacing it with a graft or artificial patch.

Webb entered the hospital Wednesday for a series of tests on the advice of his Hollywood physician.

Pollution Progress on Oil Brine

LITTLE ROCK (AP) — The Arkansas Water Pollution Control Commission reported today that it has made substantial progress in eliminating oil well brine from streams in south Arkansas.

The commission said that by June 1972 there were 130 systems for injecting brine underground, instead of dumping it into streams.

The systems were injecting 390,000 barrels of brine into the earth daily. This was more than 100,000 barrels more daily than were being injected three years ago, where there were only 80 injection systems in the oil fields.

In 1961 and 1962, the commission issued permits for construction of 55 injection systems at an estimated cost of \$750,000. Thirty-seven systems capable of disposing of 6,275,000 barrels of brine annually were completed and certified for severance tax credit during the year.

The commission said 74 other systems are under consideration.

Brine from the oil wells kill fish, eliminate vegetation and make water unsuitable for industrial use. Streams principally affected by the oil field waste are in the lower Ouachita River basin, the Dorcheat-Bodeau basins and the lower Red River basin.

Prisoners, Families 'Absorbed'

MIAMI, Fla. (AP) — Most Cuban invader prisoners and their families have been absorbed into Miami's huge refugee colony. Exile sources said today the new arrivals were seeking quiet and privacy with their loved ones after being ransomed and returned here from Cuba during the Christmas holidays.

The government put up a large number of them in former U.S. military officer quarters near Miami International Airport. Others rented apartments or moved in with friends and relatives already in the Miami area.

The Cuban refugee emergency center said some of the prisoners left Miami soon after their arrival. They went to join relatives among the 53,000 who have been settled in every state but Alaska.

The center said all of the 1,113 returning prisoners were offered free physical examinations at the center. About 400 to 500 have received the examinations.

The Cuban Revolutionary Council gave each of the returning Bay of Pigs invaders a \$250 combat bonus.

In addition, they are entitled to other refugees to a maximum \$100 a month per family in welfare funds, or \$62 per individual.

Meredith Back at Ole Miss

OXFORD, Miss. (AP) — James H. Meredith, trailed by a carload of U.S. marshals, returned Thursday night to the University of Mississippi after Christmas holidays, for the final two weeks before semester examinations.

Meredith, rumored to be in academic trouble, must keep up a "D" average to stay in good academic standing. A lower average would put him on automatic probation.

University officials continued to press for withdrawal of 300 troops still on duty to protect Meredith, a Jackson, Miss., Negro, first known of his race to enter the university.

Chancellor J. D. Williams also asked that steps be taken to stop Army plans to build barracks on the university airport.

Great Telstar Like a Brain in Outer Space

By ALTON BLAKESLEE
Associated Press Science Writer
NEW YORK (AP) — The great new feat of the space age is a service station operating from earth.

It cured Telstar, the ocean-hopping television satellite, of a kind of brain fever that had knocked it out of action for six weeks.

This service station is no ordinary kind. It is a scientific laboratory and the keen engineering brains that figured out what ailed Telstar and how to get rid of its fever, not unlike an aspirin relieving a human fever.

The stupendous thing is that it has done while Telstar whizzed around the earth out of reach at heights of 592 to 3,501 miles. Telstar even gave an unexpected assist in its recovery.

The story is told by Bell Telephone Laboratories engineers, who repaired Telstar so it can again exchange live television programs across the Atlantic. They demonstrated their success Friday.

Telstar was launched July 10 and beamed brief television programs to Europe and back.

But in November, Telstar began refusing to answer command signals from the ground to turn on power to relay signals.

Then the service station of knowledge and intelligence came into play. Bell Labs gives credit for this feat to Robert H. Shoenum, Henry Mann, John S. Mayo, Eugene F. O'Neill, Alton C. Dickerson, Walter L. Brown and Walter M. Gibson among others.

They puzzled, asked questions and came up with right answers.

They knew Telstar would encounter radiation in the Van Allen belts. Telstar equipment was designed to withstand it.

But Telstar ran into anticipated, they said. And they said they don't know for sure how much of this was artificial radiation created by the high-altitude nuclear blast over the Pacific in July.

They did know that radiation can affect the surface of transistors. It can create ions, or charged particles, from gases or solid materials in a transistor.

The ions can collect on the surface of the semi-conductor and cause harmful electrical changes. The effects become worse if a voltage is present.

The voltage serves to keep the ions concentrated. And storage batteries could supply such a voltage.

But the transistor can recover if either the radiation is removed or decreased, or the voltage is removed or decreased.

Under the high radiation encounter, the ionization apparently was hitting hard particularly at one or more transistors in the decoder in Telstar, the circuit that receives and acts upon command signals from the ground.

One clue to this was that in November, when Telstar began acting up, the command signals apparently would fail during the first couple of attempts, but then the transistor would work.

This was consistent with the suspicion that the trouble lay in surface effects of the radiation. The command signals would come to decrease the voltage coming from storage batteries to the transistor.

When the 7th grade students took the course, much of the information learned was also passed along to other members of the family. Thus, more received the much-needed instruction. One parent summed up the general consensus of opinion in this way:

"Personally, I do not believe any subject could be taught that would be more beneficial to students of this age group, who are so eager to learn, than the Medical Self-Help Program."

What was the reaction of the students to the instruction? "Amazing," said one member of the State board of health. "They know more than many adults before receiving instruction. They listened attentively, asked intelligent questions, and readily absorbed the material taught."

One reason for this, of course, is the progressive age in which we live, when so many sources of learning exist in everyday life. But so much more is needed, especially in basic medical skills which can be used in case of an emergency created by nature or man.

One student, Crit Stuart, III, son of Mr. and Mrs. Crit Stuart, Jr., was particularly interested in the lessons on radiation and was quick to point out that some things he had been told through media of entertainment had been false. "We need protection," he said, "and precautions are necessary. In case of nuclear attack, there will be some people left alive. It might be us, and we should know what to do."

Though that course went beyond fundamental First Aid, it covered that field completely, too. Cynthia Trout, daughter of Mr. and Mrs. A. R. Trout, liked the instruction regarding the use of splints and how to make a stretcher when none is available. Like many of the others in the class, she also produced favorable comment for the movie shown entitled "Rescue Breathing."

Janice Russell, daughter of Mr. and Mrs. Jamie Russell, said, "Everyone should have the course." The most interesting part for Janice and the majority of the students interviewed was the mannequin used to illustrate artificial respiration. Made in Sweden, it is the approximate size of a junior high school student, is the only one of its kind in this area, and is equipped with mechanical lungs for the perfect demonstration of mouth to mouth breathing or back pressure arm lift.

In Hope 133 junior high school students and five adults attended the classes. The program's goal is for at least one member of every family to have the course and, ultimately, for every adult to be thus trained. In the event of a national disaster, this knowledge may be vital to the survival and recovery of our free nation.

Janice Russell, daughter of Mr. and Mrs. Jamie Russell, said, "Everyone should have the course." The most interesting part for Janice and the majority of the students interviewed was the mannequin used to illustrate artificial respiration. Made in Sweden, it is the approximate size of a junior high school student, is the only one of its kind in this area, and is equipped with mechanical lungs for the perfect demonstration of mouth to mouth breathing or back pressure arm lift.

In Hope 133 junior high school students and five adults attended the classes. The program's goal is for at least one member of every family to have the course and, ultimately, for every adult to be thus trained. In the event of a national disaster, this knowledge may be vital to the survival and recovery of our free nation.

When the 7th grade students took the course, much of the information learned was also passed along to other members of the family. Thus, more received the much-needed instruction. One parent summed up the general consensus of opinion in this way:

"Personally, I do not believe any subject could be taught that would be more beneficial to students of this age group, who are so eager to learn, than the Medical Self-Help Program."

What was the reaction of the students to the instruction? "Amazing," said one member of the State board of health. "They know more than many adults before receiving instruction. They listened attentively, asked intelligent questions, and readily absorbed the material taught."

One reason for this, of course, is the progressive age in which we live, when so many sources of learning exist in everyday life. But so much more is needed, especially in basic medical skills which can be used in case of an emergency created by nature or man.

One student, Crit Stuart, III, son of Mr. and Mrs. Crit Stuart, Jr., was particularly interested in the lessons on radiation and was quick to point out that some things he had been told through media of entertainment had been false. "We need protection," he said, "and precautions are necessary. In case of nuclear attack, there will be some people left alive. It might be us, and we should know what to do."

Though that course went beyond fundamental First Aid, it covered that field completely, too. Cynthia Trout, daughter of Mr. and Mrs. A. R. Trout, liked the instruction regarding the use of splints and how to make a stretcher when none is available. Like many of the others in the class, she also produced favorable comment for the movie shown entitled "Rescue Breathing."

SOCIETY

Phone 7-3431 Between 9 A. M. and 4 P. M.

Monday, January 7

Circle 1 of the First Methodist church will meet in the home of Mrs. H. O. Kyles, Sr. at 3:00 Monday, Jan. 7, Mrs. Pearl Owen, leader.

The W.M.U. of First Baptist Church will meet at the church Monday, January 7 at 11:30 for patluck and Royal Service Program.

The Rebecca Sunday School Class of the First Baptist church will meet in the home of Mrs. Charles Johnson on Rosston Road at 7:30 Monday, January 7. Please do not bring a covered dish.

Circle 3 of the W.S.C.S. of the First Methodist church will meet in the home of Mrs. Garrett Story, Monday, Jan. 1 at 3:00 p.m.

Circle No. 6 of the W.S.C.S. of the First Methodist Church will meet Monday, Jan. 7 in the home of Mrs. Bob Turner at 2 p. m. The leader is Mrs. R. L. Broach.

Circle 4 of W.S.C.S. of the First Methodist Church will meet Monday, Jan. 7 at 3:30 p. m. in the home of Mrs. Emma Hatley 714 S. Main.

Tuesday, January 8
The Iris Garden Club will meet at 2:30 p.m. Tuesday, January 8 in the home of Mrs. Billy Dan Jones. "Monty" Monts will show a film on growing azaleas and camellias. Each member is asked to bring a line arrangement.

Chapter AE, P.E.O. will meet at 3 p. m. Tuesday, January 8 in the home of Mrs. Roy Bagley with Mrs. F. C. Crow, co-hostess.

Coming and Going

Jimmy Miller, Mrs. K. B. Miller and Mrs. Arlis Brooks, and Mr. Dale Tonemaker attended funeral services for Danile L. Malone in Tom, Okla. Friday.

Lt. and Mrs. William B. Osborn and son, Billy, have returned home to Ft. Stewart, Ga. after spending the Christmas holidays with his parents. Mr. and Mrs. Floyd Osborn and grandfather, W. A. Sutton.

Would Help Give Siberians Safety

LITTLE ROCK (AP)—A Baptist minister at Little Rock sent a telegram to the Russian Embassy in Washington Thursday, requesting that the 32 Siberians who asked for asylum earlier Thursday at the U.S. Embassy in Moscow be allowed to come to the United States.

Rev. Wesley Pruden of Little Rock sent the telegram to Russian Premier Nikita Khrushchev in care of the Russian Embassy. Pruden said he would devote his office, church and himself to securing funds for transportation and to find jobs for the "32 Fundamental Evangelical Christians" if Khrushchev would let the Siberians "take up a new life in a new land."

Negro Charged With Murder

FORT SMITH, Ark. (AP)—Thomas Silk, 32, a Negro of Fort Smith, was charged Thursday with first degree murder in the fatal stabbing of Willie Pool, another Fort Smith Negro. Silk's wife, Eva, was charged with assault with intent to kill. Police said Pool was stabbed Tuesday night at Silk's home after an argument over a radio.

Housing Project At Little Rock

LITTLE ROCK (AP)—The Little Rock Housing Authority announced a 238-acre urban renewal project west and south of the state Capitol Thursday and said the plan will help the state get property for a new Revenue Department building.

The LRHA authorized the filing of an application for an \$108,000 loan from the Urban Renewal Administration to study the area. Dowell Naylor, executive director of the LRHA, said the group will begin work immediately to find a site for a new building for the Revenue Department.

He said Gov. Orval E. Faubus asked the board last month to help in finding a site. Naylor said the area has been under consideration for some time as possibly eligible for an urban renewal grant.

The Revenue Department was permitted by an act of the 1961 legislature to issue \$1.6 million in revenue bonds to finance construction of a new building, but suitable ground could not be found at the capitol.

British Receive Teletar Picture

LONDON (AP)—British technicians said they received excellent pictures on a live television broadcast today from America via the revived communications satellite Telstar.

"The operation was a complete success," said a spokesman for the General Post Office, which operates the British monitoring station. "The picture quality was perfect."

The British Broadcasting Corp. said the teletext was recorded and that selected parts of it will be broadcast in the BBC domestic news programs tonight.

In Rome, an Italian research station said it received a one-minute test teletext from Telstar.

MAN ON THE SKEWBALD MARE

By Nelson C. Nye

By NELSON C. NYE
XXXXV

Reaching for their weapons Spangler's bunch came three abreast right at Rafe.

Rafe jerked his pistol, firing as soon as it cleared the holster. The middle horse reared and, toppling sideways, crashed into the animal on its left, kicking frantically.

The other guns blasted. Something jerked at Rafe's vest. The putt-putt of slugs came to his ears like the sound of horns. He shot the third horsebacker out of his saddle and ran on, trying in the confusion of kaleidoscoping shapes to sight Spangler.

The shouts and gun blasts beat at his ears like hammers. A whickering riderless horse slamming past nearly bowled him over.

Then, unbelievably, the street was empty, the sound of drumming of hoofbeats rapidly fading in the south.

In front of the Cow Palace saloon a man at the edge of its porch staggered upright. Another one's head came up back of a horse trough. Motionless, legs tangled, lay the horse Rafe had shot. There were three more still shapes between the bank and the harness shop.

Sparks, talking over the barrel of his rifle from one of the knocked-out windows behind Rafe, said: "All right, boys. Any pistol bangin' jasper wantin' a fair shake from me had better tromp into sight with both paws up an' empty."

The feller back of the horse trough let go of his hogleg and, raising his dewclaws, got to his feet. The gent by the edge of the Cow Palace porch didn't appear to be heeled and had already stuck up his hands.

Rafe, gun in fist and still cruising the street, didn't pay Sheriff Ed any more mind than a gopher would.

All his bitter attention when he slogged to a stop seemed glued to the third doorned shape, so shrunkenly huddled in its bottle-green coat with an arm twisted under it, the yellow hair fluttering in the dust of the street.

It was Duke Bender and he was dead. And the pair with their hands up cringed away from Rafe's stare.

Rafe looked back down into that dead face and thought of all the times he had covered for the boy, all the scrapes he'd pulled Duke out of, all the risks so recently grappled . . . wasted, gone like a gutted candle.

Firm steps drew near, an arm came out, a hand clamped warm and hard on Rafe's shoulder. "You've nothing to reproach yourself with," Pike wheezed. "You done more than most would."

Rafe shook off Pike's arm. "Who killed him?" Sparks said, coming up. "That crooked Spangler. We're well rid of both of them. And let me tell you, you sure cut the ground out from under Alph Chilton. He's still in the bank, lookin' like the sky fell on him. Mebbe we can have a little peace and quiet around Rafe Bottom now." The Sheriff's glance cut from Rafe to Pike and back. "Wouldn't consider a job as my deputy, would you now?"

Rafe pushed past the sheriff, without answering. Sheriff Ed Sparks, looking after Rafe, shook his head. "Still thinkin' about that worthless brother of his," he said. Turning, he fetched his scowl to the pair with their hands raised. "All right, you two, find your horses and drift. I don't want to see your ugly mugs again—ever!"

But Sparks was wrong about Rafe's thinking. His mind was not on Duke, but on Spangler. Even hollowed out like Rafe was, and half groggy, the killing of Duke by the range boss made a kind of topsy-turvy logic.

This guy Spangler, seeing his plans go to pot, had to hit some-

thing and to him it must have seemed that Duke had been a party to the terms of Bender's will. The thing that kept banging around in Rafe's head was the fact that Spangler cleared out like he did while the man really responsible for most of his hard luck — namely Rafe himself — was still above ground.

It wasn't natural. Would Spangler return?

Rafe said as much when Bunny, a little breathless and pale, caught up with him a few minutes later.

Bunny looked at him bigeyed. "But Spangler did clear out. I saw him," she said. "Right after he shot Duke and Sheriff Ed knocked that second fellow, named Kramer, out of the saddle. I saw Spangler fling himself flat on his horse and dig steel. It was Spangler's turning yellow and quitting that way that took the heart out of the rest of his bunch. Spangler's gone, all right. He's probably halfway to Carlsbad." She put her hand on his arm.

"I dunno," Rafe said slowly, continuing to scowl while his scrunched-up stare smoldered into the southern distance.

"Is killing all you can think of?" Bunny cried angrily. She jerked her hand from his arm and gave him a withering look. "Go on! Chase him! Take out after him I don't know why I should be worrying about you!"

XXXXVI

Raf guessed with a shrug that Bunny likely had the truth of it. Spangler, whatever else, was certainly no fool. He would have seen the cards weren't coming his way with Duke's big brother sitting tall in the leather. He probably figured what he had from stealing Gourd and Vine horses was at any rate better than a hole in the head.

Peering around for Bill Brownwater, Rafe appeared pretty disgusted when he spotted Bill and Luke with their heads bent together. Godfrey Moses! More of that love gush!

But when Luke stepped back, straightening, he could see she had the rock in her fist, the one he'd tossed Bill in the woods this morning while they'd waited for Bunny to fetch her pa to the bank.

Luke, he thought, looked pretty excited as, arm linked in Bill's, they struck off for the augmented group around Bender.

Most folks, Rafe reminded himself sourly, rather tended to get their wind up when gold came into the conversation.

He reckoned he might as well go hunt Bathsheba and head for the ranch. He looked up at the sky to study the weather.

The low hanging clouds fatly bulged, dark with rain. The dank pungent smell of it grayly clung to the town's grimy buildings, the warped false fronts, the spur scarred planks and hoof tracked dust of the windless street.

Too tired really to sort out his thoughts, Rafe decided this kind of weather was enough to depress anyone, and let it go at that. He whistled two or three times the signal he'd taught the skewbald mare to answer and, when this failed to fetch her, set off the bosque. Bathsheba had either gone too far to hear, seemed like, or she was too busy foraging to pay him any mind.

He couldn't remember when he'd been so whipped out as he was now. This clammy air stuck the shirt to his shoulders and brewed a discomfort where the beads crossed his belly, and the dreary look of that droopy woods pressed down on everything like the lid of a coffin.

Nobody could say he was cheer-

Cold weather and overheated rooms can cause dry skin and chapped lips. This girl (left) keeps her lips soft and smooth by applying a lip emollient stick under her lipstick. She uses it once more, over her lipstick to give her lips a lustrous gloss. To keep her complexion lubricated during the winter, this girl (right) uses a lanolin-rich cream.

fixed . . . a heap better than most young couples in these parous times. Not that he envied them. He'd traveled too long by himself, been too free, to look with much favor on being pinned down with the problems of a ranch—not to mention the gold or the burdens—he grimaced — of double harness.

Nope . . . he sure wasn't cut out for that.

He rasped stubbly cheek thought of Bunny, and scowled. The brush of the bosque and the half stripped trees, conjuring as these did the other times he'd been in them, were harder on his mood than that depressing street in Dry Bottom.

The leaves hung as limp as a parson's coat tails. He had no idea where to look for the skewbald mare. He whistled again, showing on through the brush, half minded to settle for a bed at the hotel.

Then he heard a faint whicker and pulled up to let her fin dhim. After three or four minutes of more, crazy thoughts he remembered what he was standing there for and whistled again. When she still didn't come he started testily after her. Sometimes she could be about as obstinate as a mule.

The spindling trees grew thicker in here. He was beginning to work up a sweat with all this bumbling around. Once more 'he whistled and heard her answer off to the left.

Pushing through a scratchy thicket he broke into a 40-foot clearing and saw her, tied with a cotton rope around her neck. While he was staring a gun went off. The clearing spun dizzily. Rafe hardly knew he was hit, until he found himself peering up off the ground into the blurred grinning face of Jess Spangler.

Then he knew why Bathsheba was tied here. He knew it was a trap. Spangler had expected him to come here hunting his skewbald mare and had waited to ambush him.

Rafe saw Spangler's gun tip again and frantically rolled. Spangler fired twice before Rafe was able to get his own pistol out of its holster.

Desperately Rafe raised his gun, feeling the bite of fresh pain along his ribs, hearing screams somewhere back of him and then remembering all of a sudden that he'd forgotten to reload!

Spangler was coming toward him crazily when Rafe squeezed the trigger. There was one shot in the gun after all. The gun blasted with a sound more sweet than an angel song.

Spangler crumbled six feet from Rafe.

And then Bunny Pike had Rafe tight in her arms and he knew everything was going to be all right now.

(The End)

Road Jobs Are Not Approved

LITTLE ROCK (AP)—State Highway Director F. R. Oliver says the opening of bids on about \$6 million in highway jobs will have to be passed over this month because the federal Bureau of Public Roads has not approved them.

Oliver said Thursday that because of delay, a number of projects tentatively scheduled for bidding this month would instead be bids on Feb. 27.

The commission has advertised for bids on only two projects for the Jan. 23 letting. One is for landscaping the south terminal interchange of Interstate Route 30 at Little Rock.

The other is for improvement of about 10.8 miles of state Highway 103 north of Clarksville in Johnson County. The project will begin at the boundary of the Ozark National Forest and extend to Ozark.

Hallmark of the current Chanel collection is the ensemble. Coat and skirt (left) are in light Scottish tweed. The color is green and is picked up in coat lining of pale green quilted shantung. Ruby red coat (right) tops a matching skirt and soft ruby taffeta blouse with scarf.

Parade of Other Women Bring Despair

By HELEN WORDEN ERSKINE

Dear Helen: Other women have paraded through my married life. Friends and relatives were "kind" enough to inform me about most of them. I've had the "pleasure" of meeting two. The last one, a girl of 19, asked me why I wouldn't give my husband a divorce.

I laughed in her face, having tried unsuccessfully to divorce him three separate times but back he would come, whimpering like a whipped cur, begging to be forgiven and promising all the wild promises such faithless creatures promise.

Time before this last he baited me with a new TV set and refrigerator. In the beginning it was groceries but never any clothes. My four children and I wear hand-me-downs from my family, yet he blows other women to trips to Mexico.

I was several months pregnant when I found out about this last girl. If it hadn't been for that I'd have left in ten seconds flat. I could jump up and down on my hat when you publish letters like those from poor fools of girls who fall for married men. One who signed herself "Want to Marry" thought her Romeo's wife should be broad-minded enough to give him a divorce. Those tear-jerking sob letters from some girl who doesn't care whom she hurts make me sick. She should get her—more than likely they deserve one another! —A Wife-Who-Knows

Dear Wife: Your bitter letter gives only one side of the story. That very bias may in part be the reason for your husband's infidelity. It takes two to make a go of marriage. Try de-personalizing your problem. Once you appraise it without prejudice, the solution will come. Let the poor, deluded girls unsmile their own tangled lives.

Lead yours with head high. Make it rich in outside interests: the PTA, reading, general improvement of your children, home and self. Rise above your weak husband's peccadilloes.

Dear Helen: In my opinion there is too much stress on the phony romantic aspects of marriage by movies, books and magazines. Newspaper, dealing as they do with daily life, are more realistic. I find a lot of people marry expecting life to be one long honeymoon. That's so much malarky.

Small wonder the calendars of divorce courts are crowded. On marriage has its romance—the real kind—provided love is deep and expressive on both sides.

If the husbands who read this want smooth sailing on the marital seas of 1963, they should resolve to be more attentive to their wives. There is nothing like an unexpected gift of roses to make a woman feel she's still young, attractive and loved. When my husband brings me flowers, his very thoughtfulness brings the springtime of youth back into my life.

Marriage becomes a living, growing thing when both husband and wife remember to remember to stick together no matter what and constantly show their love one for the other in all things great and small. —Mrs. Sharon Schultz, Middletown, Conn.

Dear Mrs. Schultz: Agreed! Common sense seasoned with sentiment is a tried and true formula for a happy marriage but—the wife should give freely too—of her time, effort and self.

Send your problem to Helen Worden Erskine. Be sure to enclose a stamped, self-addressed envelope and address her care of this newspaper. Helpful leaflets available, bwrite for "Philandering."

Kerr's Death Not To Slow Project

TULSA, Okla. (AP)—The death of Sen. Robert S. Kerr should not delay completion of the \$1.2 billion Arkansas River navigation project, Rep. Ed Edmondson, D-Okla., said Thursday after a meeting with Army Engineers.

Kerr, who died Tuesday, was a prime mover in the project to make the Arkansas River navigable from the Mississippi River to Tulsa by 1970 and Edmondson said the senator "was so closely identified with the project that his loss is irreparable."

But Edmondson, whose name has been mentioned as a possible successor to Kerr, said after a two-hour session with Tulsa District Army Engineers that most of the needed authorization has already been obtained "and the administration is committed to the project barring any national emergency."

The Tulsa District Engineer Office has immediate supervision over much of the river project, which is now under construction.

Things You Learn From Reading Mail

By HAL BOYLE

NEW YORK (AP)—Things a columnist might never know if he didn't open his mail:

The dying wish of Kit Carson, famous frontiersman, was, "I'd like to have just one more dish of chili."

No wonder American women are so lovely. They spend about nine million hours a week in the nation's 110,000 beauty parlors.

If you find you've forgotten your hanky, you can always use a dollar bill to clean your glasses—if you can find anyone who still carries that much cash around.

Sign in a Greenwich Village delicatessen: "Se habla aqui Yiddish."

The tune played most often in America is "The Star-Spangled Banner," but the most popular living composer is Irving Berlin, who had no formal musical education. His melodies are played more than two million times a year in public.

Our quotable notables: "Modern women understand everything except their husbands"—Oscar Wilde.

The familiar Rx mark on prescriptions is said to stem from the Roman sign of Jupiter. Roman doctors, legend says, adopted it in the hope of winning help from their awesome chief deity in the treatment of disease.

It now costs a U.S. firm an average of \$1.84 to send out a business letter. In Greece a postcard costs less if you limit the message on it to five words.

A kangaroo is only an inch long at birth and semitransparent like an earthworm. If you can't tell the difference between a hippopotamus and a rhinoceros, count the creature's toes. A hippo has five, a rhino only three.

The shortest war in history took place between Zanzibar and Great Britain on Aug. 27, 1896, between 9:02 and 9:40 a.m. The only engagement was a 38-minute naval bombardment. The winner: Great Britain.

Beware dating a girl who says, "I cat like a bird"—particularly if the bird happens to be a parakeet. A parakeet eats nearly 100 times its own weight in food each year.

It was James Branch Cabell who observed, "The optimist proclaims that we live in the best of all possible worlds, and the pessimist fears this is true."

Proclamation

Mayor's Proclamation

WHEREAS January, 1963, marks the 25th Anniversary of The National Foundation-March of Dimes successful fight against disease which has materially advanced the health standards of our nation,

WHEREAS Partnership of the American people and science through the March of Dimes has produced the Salk and Sabin polio vaccines and,

WHEREAS the March of Dimes supports scientific research devoted to the protection of human life through the study of the causes and means of preventing disease with this quest soon to be joined by world-eminent scientists who will work together at the Salk Institute for Biological Studies, now under construction in San Diego, Calif., and

WHEREAS the March of Dimes supports medical care for the community through a nationwide network of treatment centers—more than 50 now in operation—for victims of birth defects, arthritis and polio and,

WHEREAS the March of Dimes supports public and professional education to increase general awareness and understanding of the problems of chronic crippling diseases and makes available the most advanced knowledge concerning effective care and treatment and,

WHEREAS more than 250,000 American infants are born each year with a significant birth defect; thousands of our children are disabled by arthritis and rheumatic disease; millions of dollars must still be spent annually to aid the thousands stricken by polio.

THEREFORE I, Frank Duoglas, Mayor of Hope, do hereby proclaim January, 1963, as 25th Anniversary March of Dimes Month and urge all citizens to support this campaign to "Give for the Life of a Child."

Explosion Rocks Club at Hot Springs

HOT SPRINGS, Ark. (AP)—An explosion cocked the Vapors night club and gambling casino today while a school for croupiers was being conducted.

Seven persons were treated in a hospital for cuts and bruises. Police said several others were shaken up by the explosion.

Fire Chief Vern Smith said an odor in the club after the blast smelled like dynamite. He said the fact that the roof over the lobby had been caved in also indicated a dynamite blast.

An employee of the club said maintenance men were working on the roof of the club Thursday. He attributed the explosion to a collection of gas.

Pieces of twisted steel and chunks of concrete were scattered about the plush lobby. Some debris was blown into the restaurant area.

It was learned that several persons were in the gambling casino at the time, attending a school for croupiers. Hot Springs casinos are training their own gambling table operators to get around a new federal law that prohibits bringing people across state lines for gambling purposes.

Ginny Tiu, child television and entertainment star, is appearing in nightly shows at the Vapors, one of this resort city's biggest clubs.

Smoke billowed from the building after the explosion but there was no fire.

The seven persons being treated were Mrs. Beverly Longmott, 40; W. C. Tucker, 52; Jack Atkins, 44; Jack Fry, 67; Jack Holmes, 33; Bernis Blake, 23, and Steinberger, 34, all of Hot Springs.

Job Loss Keeps State Down

LITTLE ROCK (AP)—A gradual loss of manufacturing jobs in Arkansas is preventing full bloom by the state industrial program, William P. Rock, director of the Arkansas Industrial Development Commission said Thursday.

"We're filling the bucket at the top, but there are holes in the bottom," he said. "We've got to plug those holes somehow."

Rock said the state loses about two manufacturing jobs for each three new ones the AIDC announces.

The AIDC has announced about 70,000 jobs in the eight years of its existence, but manufacturing employment has increased only about 30,000 to about 115,000, he said.

Rock said, too, that some firms which eventually may employ up to 200 persons "get along for years" with fewer employees. He cited the example of Potlatch Forests, which listed potential employment at 400 when it announced a paper mill at McGehee several years ago. The AIDC has the 400 jobs on its books, but the mill has yet to be built.

Late Show Sat. at Saenger, Sunday - Monday at Saenger

AT KNIFE'S POINT — Hedy Calhoun counters a lovely lady's threat with charm and diplomacy in tense scene from American International's "Marco Polo." Cinemascope and color adventure spectacle.

Sat. & Sun. At Dixie Drive In

"THE MAN WHO SHOT LIBERTY VALANCE" Stars James Stewart, John Wayne, Vera Miles, Lee Marvin, Edmond O'Brien, Andy Devine and Ken Murray in the legend of the winning of the west as two great stars (Wayne & Stewart) appear together for the first time on the giant screen.

Phone Firm Is Allowed to Borrow

LITTLE ROCK (AP)—The Public Service Commission gave the Lavaca Telephone Co. authority today to borrow \$230,000 from the Rural Electrification Administration to finance conversion of its system to dial.

The commission also assigned the company some additional rural territory in Franklin and Sebastian counties.

In another order, the commission amended its order of Dec. 11 setting out how General Waterworks Corp. should spend the proceeds of an \$11.2 million bond issue.

The changes were made at the request of the company.

Under the new order, General Waterworks will spend \$8,300,000 to retire existing bank loans, \$800,000 to retire bank loan of its subsidiaries and \$866,000 to retire other debts of its subsidiaries.

General Waterworks operates water companies at Pine Bluff, Russellville and several other Arkansas cities.

The commission received a request today from the Interstate Telephone Co. for authority to increase rates to about 20 customers at Waltrip from \$2.50 a month to \$4.25.

Interstate said the customers, served out of the Waldron exchange, were charged under a special contract because they once contributed \$2,000 to the \$8,000 cost of building facilities to serve them.

The company said the \$4.25 rate would only bring the rates at Waltrip in line with those charged in other rural areas it serves.

Cooper Is Next for Space Trip

WASHINGTON (AP)—America's next man in space—scheduled to be astronaut Leroy Gordon Cooper Jr.—may try to orbit the earth for 34 hours, 10 hours longer than originally planned, reports a space agency spokesman.

A decision on whether to try for 22 instead of 16 orbits probably will be announced next week, the National Aeronautics and Space Administration spokesman said.

The last U.S. orbital flight, by Walter M. Schirra Jr. continued for six orbits and lasted for 9 hours, 12 minutes.

Cooper's flight is scheduled to last 34 hours, 10 minutes, and 30 seconds.

Cooper will be launched on Saturday, Jan. 12, at 10:00 a.m. EST from Cape Kennedy, Fla.

Cooper will be launched on Saturday, Jan. 12, at 10:00 a.m. EST from Cape Kennedy, Fla.

Cooper will be launched on Saturday, Jan. 12, at 10:00 a.m. EST from Cape Kennedy, Fla.

Russia Again to Raise Berlin Issue

By REINHOLD ENSZ

MOSCOW (AP) — Moscow's diplomatic colony is buzzing with rumors that Premier Khrushchev may soon make a significant to East Berlin.

The sixth congress of East Germany's Communist party opens there Jan. 15. Some diplomats feel the Soviet leader might use the occasion to put new life into the Berlin problem and to boost the sagging prestige of East Germany's Communist leaders.

These diplomats wonder whether Khrushchev's latest pronouncements on Berlin — one to West German Chancellor Konrad Adenauer, the other to London's Daily Express — might have been advance notice of a new Berlin offensive.

Other diplomats feel that Khrushchev has no desire to stir up the smoldering Berlin coals and will send a deputy to the meeting.

The two most prominent Soviet leaders who have not attended a foreign congress recently are both first deputy premiers—Anastas I. Mikoyan and Alexei Koygin.

Some Western observers doubt that Mikoyan would be sent, having just finished with the face-lifting Cuban situation. If he did, go East German officials might get

Interest in Plant

CHICAGO (AP) — Michigan Chemical Corp., which has a plant at El Dorado, Ark., has sold an interest to Velsicol Chemical Corp., it was announced Thursday. Michigan produces bromine, methyl bromide, magnesium oxide and other chemicals. Velsicol makes hydrocarbon resins, solvents, chlorine, caustic soda and agricultural chemicals.

the idea they are being put in the same category with Fidel Castro. Kosygin possibly is a likely choice since East Germany is having serious economic problems. His specialty is economic planning.

If Khrushchev does not go to East Berlin, East Germany's economic plight could be a major reason. Khrushchev does not like to be associated with second-rate situations. They undermine his prestige.

The last East German party congress was held in July 1958. Khrushchev attended it. Four months later, on Nov. 27, he demanded that Allied troops clear out of West Berlin in six months and that West Berlin be converted into a demilitarized free city.

We wish to express our heart felt appreciation for the flowers, food and words of comfort rendered to us during our bereavement. Also, we thank Dr. Wright, Dr. Holt and the nurses, and the funeral home.

May God richly bless every one.

Expense Cut Spoils a Lot of Playing

By STERLING F. GREEN

WASHINGTON (AP) — Many Americans have raised their standard of living—and drinking and playing — by deducting personal outlays as business expenses.

But the government changed the rules as of Jan. 1 with an income tax regulation that demands solid substantiation of all claims for business entertainment, gifts and travel.

The spoilsport 87th Congress declared, in effect, that the Treasury will no longer absorb bar bills, supper club checks, greens fees or club dues unless the spender proves a business-getting purpose.

In translating the law into a 33-page regulation, Commissioner Mortimer M. Caplin of the Internal Revenue Service has struck with special force at what he called "great discrepancies and some deliberate abuses and fraud" in business entertaining.

The rules could cause a ripple of resignations from country clubs, a weakening of the brisk market for private swimming pools and the forced sale of some fancy pleasure boats.

But Caplin had to hew to the letter of the law, even when it created some intriguing problems which still haven't been solved.

For instance, Congress said clearly that family and personal expenses could not be deducted as business expenses. It didn't say how to treat the situations in which business and personal life overlap.

For instance: A businessman can deduct the cost of taking his secretary on a business trip, but gets no deduction for his wife unless there is a business reason for her to come along.

The tax status of wives will be clarified, IRS promises, in future regulations due next month. None too soon, it would appear, for Caplin already has been accused in official earnings of fostering "moral decay."

The basic rules are clear, however—painfully so, to those ready spenders who didn't need big bankrolls because they had fat expense accounts.

Deductions are allowed for a meal or other entertainment which directly precedes or follows a substantial and bona fide business discussion. Every such outlay must be entered in the taxpayer's expense diary. If it comes to \$25 or more, a receipt or voucher must be kept.

The diary entry must show the amount spent, the date, the name and location of the place, the kind of entertainment, the business reason for the entertaining, and this additional set of facts:

The name of each person entertained, as well as his title or other designation sufficient to establish a business relationship with the taxpayer.

These exceptions are noted: 1. Other guests need not be named, if they have no business connection. IRS will spell out, in a future regulation, how to figure the deductible portion of the cost.

2. Company secrets or classified matters need not be told in the expense diary, so long as they are recorded and kept available to revenue agents on demand.

3. If there are a number of business guests, not all need to be named. A satisfactory entry might read like this:

"June 10, 1963—Lunch, cocktails and tip, \$62.50; Milford Cafe, Bridgeport; for T. L. Young, sales manager, Anchor Distributing Co., and his force of 8 salesmen; to discuss promotion of new line of

Nashville in Second Win Over Bobcats

By CARTER HARDAGE

Friday night at Jones Field House a large crowd saw Hope and Nashville clash and take a game apiece. In the first game Hope's Senior Girls edged out the Nashville Ladies 40 to 36, but in the second game the Scrappers smacked the locals 66-58.

The Lady Cats managed to defeat Nashville 40-36. Hope took an early 12-11 lead at the quarter and widened the gap 24-19 at the half and 34-26 at the third quarter. Janice Lloyd was high scorer with 20 points. Then came Shirley Smith with 14, Annette Hatfield with 4 and Phyllis Martin with 2. Guards playing were Gwen Farmer, Regina Smith and Gayle McGill. Page was high for Nashville with 22.

In the second game Hope was taken 66-58. This was the rubber match with Hope winning one and losing one. Hope scored 58 points in each of the three games. Things were smooth in the first quarter with Hope leading 16-14, but the game grew tense with Nashville leading 25-23 at the half. Things really started popping during the third quarter and at the end, it was 41-39. But the fourth quarter was the clincher. Hope had 10 fouls called on them to only 3 for Nashville. The Scrappers were able to widen the gap and win 66-58, Earl Ray Murphy

luggage." Since any single expenditure of \$25 or more calls for a receipt or voucher, IRS has had to offer some advice on what constitutes one expenditure. These may be helpful:

A dinner followed by a theater party would be two expenditures. Two rounds of drinks in a cocktail lounge would be one expenditure, even if paid for separately. Drinks in a cocktail lounge, followed by dinner in a dining room, would be two expenditures. Drinks and dinner at the dining table would be one expenditure.

The tip can be included in the charge for meal or drinks, for record-keeping purposes. But if this would put the bill over the \$25 limit, the tip can be noted separately.

The rules for recording business gifts are similar, in general, except that no receipts are ever needed. That's because Congress allowed no deduction at all for gifts exceeding \$25 to one person in one year.

The names of gift recipients can be left out of the diary if the presents are inexpensive — like tickets to a high school football game—and distributed to a number of persons.

Special rules have been written to curb abuses arising from the entertainment use of what IRS calls entertainment "facilities." The term covers dues paid to private clubs, the rental of hotel suites, and the costs of maintaining yachts, swimming pools, beach cottages or hunting lodges.

Many taxpayers have taken deductions for part of these costs because they were used for business entertaining. Henceforth no deduction is allowed unless 51 per cent or more of the use is for business purposes.

To substantiate the 51 per cent rule, the taxpayer must show in his day-by-day expense diary not only the business entertaining done, but also each use by the taxpayer himself or members of his family.

LIFE

... what is it? Here, it is represented in the newborn. Generally speaking, "it is a vapor that appears for a little while and then is gone," James 4:14. Life from birth to seventy seems a very long time. But brother, reverse the sentence and take a look... *seventy back to birth* is so very short. Anyhow, the value of a life is determined by how well it is lived and not by how long it is. Every worthwhile life consumes its self serving others... administering to the sick, giving to the poor and challenging them to prepare for the Life Eternal. *The good life is full of little deeds made meaningful by a few Godly decisions.* Then attend worship services regularly.

You In The Church
The Church In You
... form a combination for good. Every man, woman and child needs the influence of the church. So, come let us go into the house of the Lord. Let us support her program of service to humanity, be a faithful worker, a daily bible reader and attend services regularly.

**WE NEED
GREATER CHURCHES
and a
GREATER FAITH
TO HELP US
Combat Communism
ON ALL FRONTS**

The Ninety and Nine Were Safe; — But One!?
